

Covid-19 Update:

Due to the prevailing lockdown, our staff are not able to come to work and therefore we are not able to keep the centre open.

Karthik Ultrasound Scan Centre will remain closed for regular appointments till 14th April 2020. Further notification will be made on the 14th April 2020.

Precautions we will take at our Centre when we resume operations, till the pandemic abates:

We do not want patients and attenders to mingle. Therefore, appointments given, if any, will be fewer and far apart.

Only one attendant will be allowed with a patient. The attendant will not be allowed into the scan room, but must wait in the waiting room in the same seat they initially chose to occupy.

No children will be welcome in the Centre. The patient and attendant must come wearing their own masks. We shall provide sanitizer in the Centre.

No handbags, purse, mobile etc of the patient or attendant will be allowed inside the scan room.

Before each scan we will be cleaning the examination couch inside the scan room. We will repeat the process when the patient departs.

After each patient departs, we will be cleaning the seats they occupied, with sanitizers.
